4COSCO11C.2 Web Design and Development

Tutorial 2

Task 1 - Create your Web Page content

Create a file and save it as tutorial2.html

Your Web Page should follow the following specifications.

Part 1

- Tutorial 2 for the title.
- Pool Schedule (your name) as the page heading
- The schedule shown below in a HTML table.
- The first row of the table should contain the prices shown using a list. You may need to use a HTML entity **£** to display the '£' sign correctly. HTML character entities are used to display reserved characters.
- Demonstrate the use of both rowspan and colspan in the table.
- A ruler acting as a separator.
- Your email address inside an address element.
- The last modified date (just add today's date (hard coded)).
- See the following image for an example of the layout.
- Remember, you can check if your markup is syntactically valid using the Validator at: https://validator.w3.org/

    o Use the 'Validate by File Upload' or 'Validate by Direct Input'.

Part 2

- Use CSS to style the Schedule. For example, give repeated items (such as SwimFit, Lane Swim) matching text or background colours.
    o Use an embedded style sheet and do NOT use inline styles.
    o Use a class to identify repeated items and apply a colour for each class.
- Additional CSS.
    o Experiment with padding to make space around the text within the <td>s.
    o Experiment with the different border-style values: solid, dotted, dashed, double, groove, ridge, inset and outset.
    o Experiment with the border declarations:
        ▪ border-collapse: collapse;
        ▪ border-collapse: separate;
    o Experiment with the unordered list styles: square, circle, disc (default), and none.

Pool Schedule (your name)

Prices:

- Free - Infants (0-3)
- £3 - Child (4-12)
- £4 - Youth (13-17)
- £5 - Adult

	7:00-8:00	8:00-9:00	9:00-11:00	11:00-5:00	5:00-7:00
